- **Practical** Use in hard-to-reach spaces
- **Versatile** Non-slip & reflective coatings
- Full on-site support for first time users
- Consistent material colour throughout

We can supply any shape, sign, letter, line or graphic.

Hotline makes markings easy.

Whether you need to create new markings, renew worn markings or replace damaged markings Hotline is simply the right choice.

Here's why:

Hotline is easy & cost-effective

Hotline is easy to apply by just one person so jobs are simple to organise and cost-effective.

No sophisticated or truck-mounted kit is necessary. Application in areas like multistory carparks is easy.

Minimise downtime, Hotline can be trafficked once cool.

Choose your Hotline

White and yellow lines: Hotline is available in 1m strips or 5m rolls at widths of 50 - 200mm.

Markings: Hotline is also available as ready-to-use numbers, letters, directional arrows and symbols in a variety of colours.

Logos and graphics: Hotline sheets may be cut to any shape you wish and supplied ready for use.

Basic tools for the job

Dutch burner with regulator, soft brush, chalk, measuring tape and primer (as necessary dependant on road surface).

Tips for easy application

- The surface should be sound, dry and in good condition. The temperature should be moderate.
- Lay out Hotline material. Using an appropriate gas Dutch Burner apply heat side-to-side across all areas of material. Continue applying heat until Hotline can be seen to fuse into the surface. Ensure edges are completely sealed.
- Once cooled, check that you have a successful bond between the Hotline and the surface.
- When cool, Hotline can be trafficked.

Ensure that you read our complete application instructions before commencing work.
